Professional Summary

Computer Science and Data Science undergraduate with strong foundations in Java, SQL, and Object-Oriented Programming. Familiar with Spring Boot, MySQL, and web development concepts, with a keen interest in backend development and problem-solving. Seeking an entry-level Software Developer role to apply and enhance my technical skills.

Education

VIVEKANANDA COLLEGE OF ENGINEERING AND TECHNOLOGY

Bachelor of Engineering; CGPA:7.3/10.0

SDM PU College

Class 12th-PCMB; Percentage:86.16%

Puttur, India

Oct. 2023 – May. 2027

Honnavar, India

Aug. 2021 – May 2023

Technical Skills

Web Development: HTML, CSS

Frameworks: Spring Boot, Spring Data JPA, RESTful APIs

Databases: SQL, MongoDB

Core Concepts: OOP, Data Structures and Algorithms

General Purpose Programming Languages: Java

Tools: GIT, Github, Visual studio code, Postman

Projects

PlacementPro AI | *Java, Spring Boot, React, MySQL, JWT, REST API, Git*

[\[Source Code\]](#)

- Developed an AI-powered placement preparation platform featuring resume analysis, coding practice, and mock interview modules to help students prepare for campus placements.
- Implemented secure authentication, personalized dashboards, and AI-driven skill extraction and interview question generation.
- Designed a responsive user interface with progress tracking and performance analytics to provide personalized learning insights.

CivicConnect | *Java, Spring Boot, MySQL, JWT, REST API, Cloudinary, Maven*

[\[Source Code\]](#)

- Built secure backend APIs and complaint management modules to streamline communication between citizens and authorities.
- Developed a web-based platform for citizens to register and track civic complaints with image upload and real-time status tracking features.
- Implemented complaint filtering, status updates, and notification mechanisms to improve issue resolution efficiency.

Smart-Task-Manager | *Java, Spring Boot, MySQL, JPA, REST API*

[\[Source Code\]](#)

- Developed a task management application for creating, updating, and tracking daily tasks efficiently.
- Implemented secure user authentication and task management features with persistent data storage.
- Designed task categorization and status-tracking features to improve productivity and task organization.

Mesh Link | *Kotlin, Jetpack Compose, Room, SQLCipher, WorkManager, Dagger Hilt*

[\[Source Code\]](#)

- Developed an offline-first Android application enabling secure peer-to-peer communication over decentralized mesh networks.
- Implemented end-to-end AES-256-GCM encryption, reliable messaging, and local trust management for secure communication.
- Designed a modern Jetpack Compose-based interface and optimized data synchronization for operation in intermittent network environments.

Achievements

Winner iVITon Medical Track, graVITas 2025 (VIT Vellore): Secured #1 place in a national-level innovation competition.

Certifications

CodeHelp: Basics of Java Programming (2026)

iVITon Medical Track: graVITas 2025

Outskill: Generative AI Mastermind (2026)
